

Well. what makes Multi-box so unsurpassed?

Well, what makes Multi-box so unsurpassed?

Built-in Unibox .

As you know, none service center can't be without UNIBOX. In most cases UNIBOX will let you connect any mobile phone to your PC. Both for synchronization, content writing into phone and for service – simlock, flashing, change of language pack, diagnostics and restoring. UNIBOX works through USB port that allows you to work at high speeds – this is very important point when working with phones with big memory size.

Built - in JTAG .

This is essential thing for restoring phones with erased BOOT zone. So what is this ? We think everybody faced the problem that phone can't connect to any device – this is the case when flash zone responsible for loading is erased and you can't restore such phone using ordinary tools. JTAG lets you restore such phones as Panasonic, Sendo, VK, Motorola, Philips with erased boot.

Specialization IN .

In the given case these are the programs for phones for which there is no free qualitative solutions. Initially we included to our project «IN» for Sendo, Maxon, Philips and Alcatel. Due to these programs you can completely forget about problems with unlocking, flashing, language packs change, diagnostics and restoring of given model line. Our product has in itself the unique «IN», which has no analogs. For example, for Philips this is possibility to work both through TAT MODE and BOOTSTRAP (JTAG that lets you restore phones which won't power on and connect to any device). Sendo JTAG – no one in the world has this tool. Allows restore phone with erased boot and unlock certain model line – and again no one in the market has this.

Possibility to work as CLIP.

It's very important to know that our product has possibility to work standalone, as independent device. This is very comfortable when you has huge set of phones but no computer. CLIP function is very convenient and simple in use. You just need to connect phone and press button on our MULTI-BOX and your phone will be unlocked in a few seconds. We activate Sendo CLIP in the basic version.

Very reliable protection .

This is very important point to pay attention buying any device. Yes, how long your product will be supported by the author depends exactly on this because as it's known cracked product are left without any support at all. But our product has the whole line of protection. We won't mention each of them, but for example, such thing as protection on smart-card, which has in itself X levels of protection, makes us sure that it's not so easy to crack given box.

On-line update and support.

Given feature makes you sure that software of our box will be always updated and this lets us expand line of supported phones and completely excludes possibility to clone our product. More over, supporting our customers in forums, by e-mail and in chats makes you sure that you will be always able to get answer for any of your questions.

Unique hardware .

In this device we united the most necessary things not only for today. Hardware of our device is so unique . Unique because it let combine so huge amount of necessary things for successful work of any service center. This is USB connection with PC, built-in USB END POINT, built-in CLIP, JTAG, UNIBOX and more over our hardware is so universal that it will let our box work with any mobile phone and not only with phones. Our box supports all the platforms, besides this we aspire to add to our box more and more of new supported platforms such as Nokia, SE, Motorola and others.
